

Project details

Services /

Project Management
Lead Consultant

Value /

£5.3m

Location /

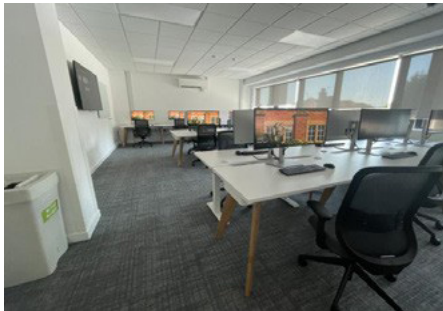

Southampton

Contract /

JCT Intermediate with
Contractor Design

Creation of new Chemical Engineering Facilities to include Laboratory, computer suites, and general teaching spaces for a new department at the University. Rekan led the design team, taking the client brief and developing the concept all the way through to completion. The works involved a number of complicated moves to allow space to be freed up within the Chemistry buildings.

Key challenges/features

- / Established the concept and assisted the Users with funding.
- / Developed a solution to ensure the laboratories were situated in the most appropriate location.
- / Worked with the User groups to establish the client brief for the new department/course offerings.
- / Relocated the business-critical Chemistry stores.
- / Worked within live, high-risk Chemistry buildings.
- / Managed the project when the Main Contractor went into liquidation.

Rekan scope

- / **Project Management** / Overall project coordination/management including consultant scopes/appointments, Client/User briefing, design management/coordination, programme/logistics/risk management, Client reporting, stakeholder management/liaison.
